

A

Eight-context hierarchical task

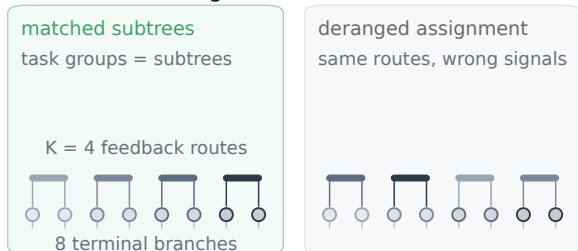

context $c = 3$ selects stream 3; selected stream carries $+y$; all streams active

**B**

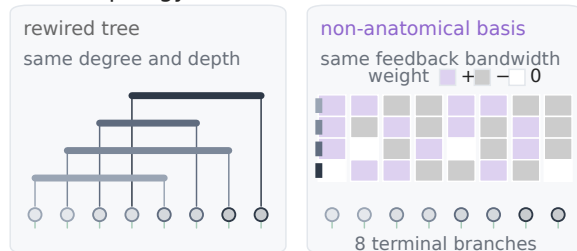

Feedback bandwidth within one neuron

**C**

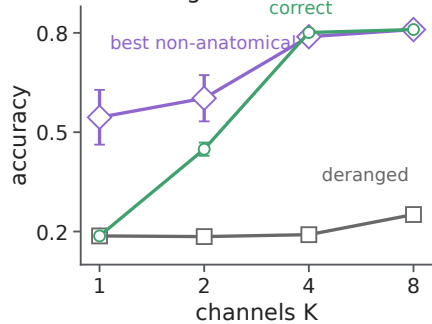

Route-assignment controls at $K = 4$

**D**

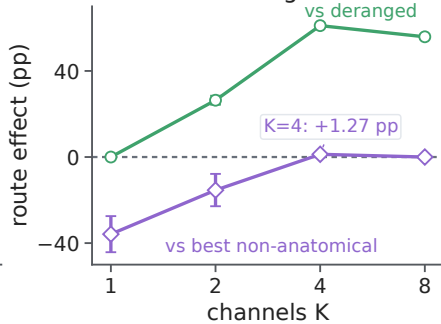

Topology and basis controls at $K = 4$

**E**

Learning across bandwidth

**F**

Route assignment vs deranged

**G**

Matched versus rewired topology
