

o

Alignment × bandwidth phase plane

- Trained factorial, $K \in \{1, 2, 4, 8\}$
- Spectral sweep, $K=4$ (theory)
- MICrONS controlled, $K=8$
- Measured responses, $K=4$
- Credit reversal, $K=2$
- anatomical routes win / tie
- anatomical routes lose

Bands: credit-operator regimes (conceptual boundaries, not fitted).

Labels: ancestry-minus-best-control endpoint. Exact point coordinates and display offsets are in Source Data.
