

A

Credit-operator utility

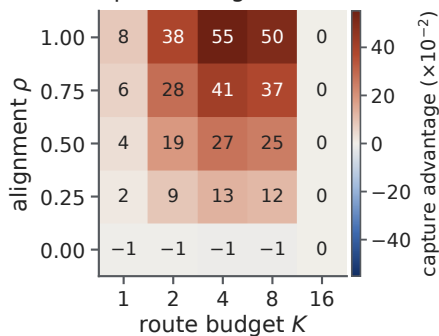

$$\text{guarantee} \propto \frac{[g^T M g]^2}{\|M g\|^2 + \text{tr}(M \Sigma M^T)}$$

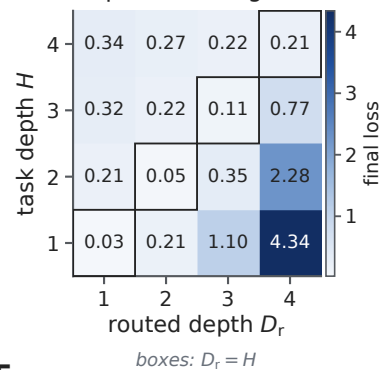

signal² / (gain + noise)

B

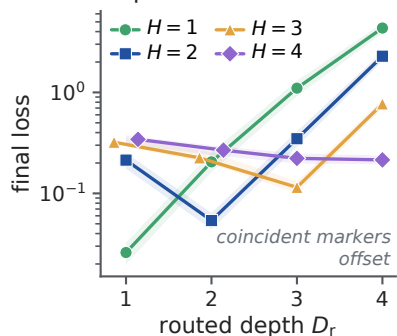

Spectral alignment

**C**

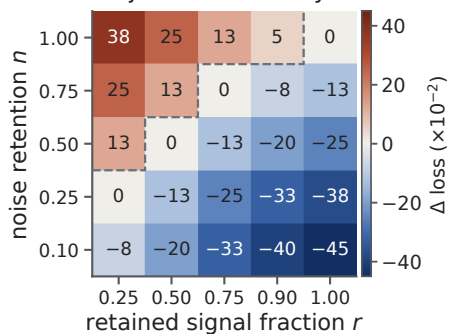

Depth matching

**D**

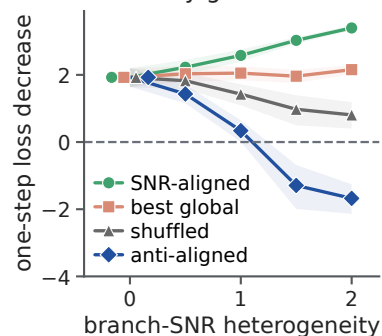

Depth crossover

**E**

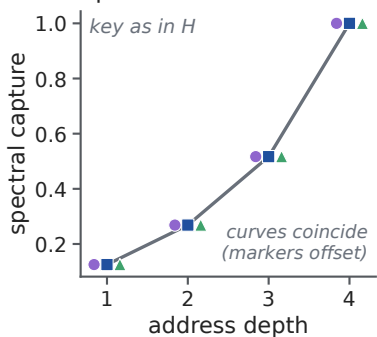

Projection boundary

**F**

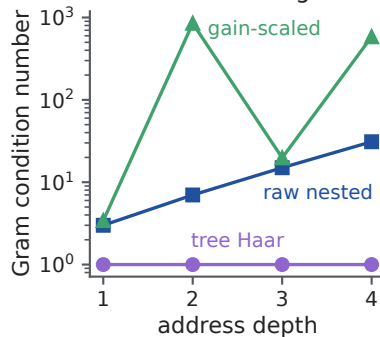

Reliability gains

**G**

Span invariance

**H**

Route conditioning

**I**

Predictive utility
